

# Worship Team Expedition

take it to  
the next level.

## Week 3 Discussion Guide

At worship team rehearsal this week, take just a few minutes at the beginning to gather the team and talk through these questions. These group discussions will help you to encourage one another along the way and will provide accountability for the group. The head knowledge you pick up during these weeks will only go so far. **You'll really get traction to actually go to the next level when your behavior changes— for instance, walking more closely with Jesus and practicing!**

In the Song Building Blocks video, Peter and the band demonstrated a number of moments and transitions we could use to build song arrangements. What is one idea you took from watching them that you can apply to practice today and the worship set this week?

Again this week let's "walk in their shoes" (look at it from another's perspective). This may be a tiny bit scary, but be brave! Ask one person on the team these two questions: "What do you wish our team was more aware of about your role?" and "What do you need most from me?"

What is the most important thing you learned (or were reminded of) from all the online materials (videos, devotion, etc.) this last week? How can you/we put that into practice on our worship team?

And finally...

Did you read the devotional or spend regular time with Jesus this week?

How much time did you spend preparing for this week's worship set?
