

# Worship Team Expedition

## SESSION 8 OUTLINE

### **Houston We Have A Problem: *Making Technology Work For You*** **Part 3- Media Presentation**

#### **The goal of media presentation:**

Subtly \_\_\_\_\_ the moment and \_\_\_\_\_ distractions.

Context: be \_\_\_\_\_ of the moment, project things onscreen to match it.

Content: stay \_\_\_\_\_ with, enhance the overall message or surrounding.

Non-linear presentation software gives more flexibility:

Media Shout, ProPresenter, Easy Worship, Sunday Plus, SongShow Plus

Important Big Idea: \_\_\_\_\_ the songs, \_\_\_\_\_ the talk.

Songs: anticipate the next slide and get slightly ahead of it; change to the next song slide a few words *early*.

Message: wait for the speaker to get there *before* you put up the slide being talked about.

Backgrounds should fit the look and feel of what's being presented.

Backgrounds should always \_\_\_\_\_ words, not \_\_\_\_\_ them visually.

Dark backgrounds with \_\_\_\_\_ text are best.

Use images to frame words, not \_\_\_\_\_ with them. Images at the bottom, top, or sides are better than images in the center.

Stay within the “\_\_\_\_\_” area (similar to margins on paper). Keep text away from edges of the screen.

### **Best Practices:**

Have \_\_\_\_\_ media loaded in the computer the day before.

Know the songs. \_\_\_\_\_ to them and \_\_\_\_\_ along with them; know the first words of each verse, chorus, bridge, etc.

\_\_\_\_\_ along with the team before the service (rehearsal or run-through).

Remember– you are an \_\_\_\_\_ member of the team, your contribution is as important as any musician!

Stay \_\_\_\_\_ to the moment, to what’s happening with the worship leader or speaker.

Have \_\_\_\_\_, you are helping people worship!

The goal is to help people focus on Christ by \_\_\_\_\_ the music, media, or message and \_\_\_\_\_ distractions.
