

Worship Team Expedition

Week 8 Discussion Guide

At worship team rehearsal this week, take just a few minutes at the beginning to gather the team and talk through these questions. These group discussions will help you to encourage one another along the way and will provide accountability for the group. The head knowledge you pick up during these weeks will only go so far. **You'll really get traction to actually go to the next level when your behavior changes— for instance, walking more closely with Jesus and practicing!**

In the video, Peter talked about ways the media presentation can enhance the music or message and eliminate distractions. Which one or two of those tips stood out as being most important for your team to implement first? Which of the common “distraction pitfalls” is your team most likely to fall into?

Let's “walk in their shoes” for a minute (look at it from another's perspective). Ask your media presentation team members to share with the group an aspect or two of their role(s) that the group may not know about. Find out one important way the team could better support your media presentation person or team. Then say how much you appreciate all that person/team does for the worship experience!

What is the most important thing you learned (or were reminded of) from all the online materials (videos, devotion, etc.) this last week? How can you put that into practice on your worship team?

And finally...

Did you read the devotional or spend regular time with Jesus this week?

How much time did you spend preparing for this week's worship set?
